

Rx

Metoclopramide Hydrochloride Tablets IP

METOZESTOXY-10

Tablets

Each Uncoated Tablet Contains:

Metoclopramide Hydrochloride IP

eq. to Anhydrous

Metoclopramide Hydrochloride 10 mg

Excipients q.s.

DESCRIPTION: It works by increasing the movements or contractions of the stomach and intestines. It relieves symptoms such as nausea, vomiting, heartburn, a feeling of fullness after meals, and loss of appetite. Metoclopramide is also used to treat heartburn for patients with gastroesophageal reflux disease (GERD).

MECHANISM OF ACTION : The antiemetic action of metoclopramide is due to its antagonist activity at D2 receptors in the chemoreceptor trigger zone in the central nervous system — this action prevents nausea and vomiting triggered by most stimuli. Metoclopramide also increases the tone of the lower esophageal sphincter.

INDICATIONS: Metoclopramide oral tablet is used to relieve heartburn caused by gastroesophageal reflux disease (GERD). It's also used to treat symptoms of diabetic gastroparesis.

Uses : This medication is used to treat certain conditions of the stomach and intestines. Metoclopramide is used as a short-term treatment (4 to 12 weeks) for persistent heartburn when the usual medicines do not work well enough. It is used mostly for heartburn that occurs after a meal or during the daytime.

CONTRAINDICATIONS / PRECAUTIONS

- Paraben hypersensitivity, procainamide hypersensitivity.
- GI bleeding, GI obstruction, GI perforation.
- Cardiac disease, heart failure, hypertension, pheochromocytoma.
- Parkinsonism, Parkinson's disease, seizure disorder, seizures, tardive dyskinesia.

SIDE EFFECTS:

- Feeling restless;
